

YOUR LAB RESULTS

You can view your normal lab and radiology results from the Patient Portal. You will continue to be contacted by your provider for all other results. If you have any questions about your lab results, please send a message to your provider under the *Test Results* category. Please see the *Messaging Your Provider* guide on the Patient Portal home page or the BVCHC website.

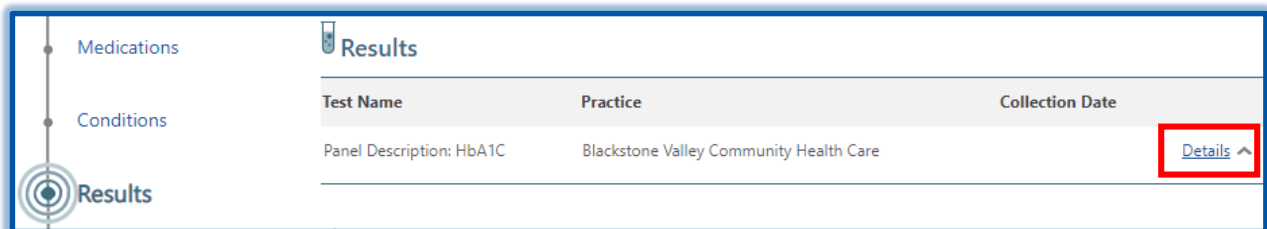

VIEWING YOUR LAB RESULTS

While you can get a quick view of your most recent lab results from the **Results** section on Patient Portal home page, you can view details in **My Chart**.

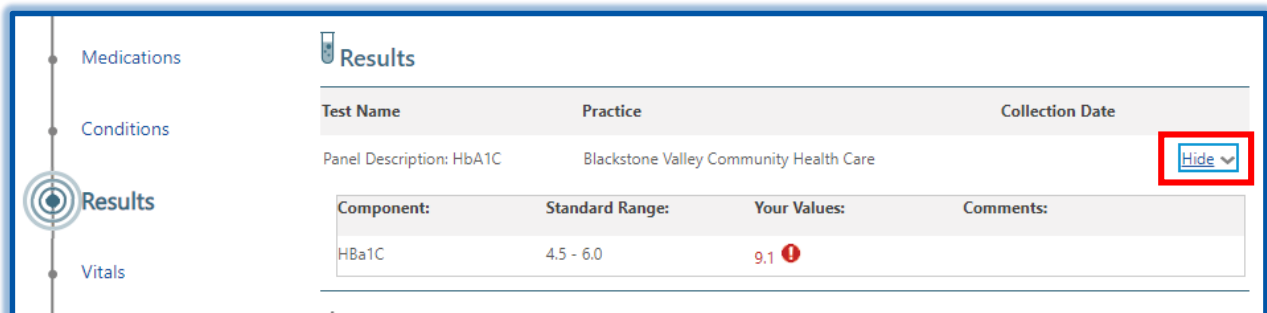

1. Click on **View Results** to view the details of that lab result.
 - Your lab results can be sorted in the home page by clicking the header labels.

2. You will be taken to **My Chart**, under **Results** where you will be able to expand and collapse the details of the various lab results you may have.

3. Click on **Details** on the right side of the result to view more details.

If you experience any problems with the NextGen Patient Portal, please contact our practice at 401-312-5233 or patientportal@bvchc.org.
